

DOCTOR DOOBIE

WHITE PAPER V2

A SOLANA ORIGINAL / SEPTEMBER 2026

THE DOCTOR IS IN.

Born from cannabis culture, carried by a character, and built on Solana. Meet \$DOOBIE and follow the on-chain trail for yourself.

01 / THE PROJECT

MEET THE DOCTOR. MEET \$DOOBIE.

Bright blue eyes. Red tie. Head mirror. Doctor Doobie is a character you can spot through the smoke, and \$DOOBIE is the Solana meme token at the center of his world.

The project began in 2024 at the crossroads of cannabis humor, internet culture, and crypto. Today, its home brings the character, market tools, and the public record of its LP token lock together. The character gives people a reason to gather. The token gives them something shared to follow. The records let anyone check the facts.

THE WORLD / 01**THE CHARACTER**

A recognizable face and a home for the Doctor Doobie story.

THE WORLD / 02**THE TOKEN**

A Solana meme token with public supply and authority records.

THE WORLD / 03**THE LOCK**

A traceable LP position with a recorded unlock date.

Doctor Doobie has a personality. The chain has receipts. This paper brings both into the same room.

02 / TOKEN FACTS

THE TOKEN.
UNDER THE LENS.

WHY TWO NUMBERS? The original mint transaction issued exactly 420,710 DOOBIE on 30 March 2024. The mint now records 1.03939301 fewer tokens. A holder or approved delegate can burn tokens without mint authority, but the specific transaction or transactions behind this decrease have not been identified. Current supply does not show how tokens are distributed among wallets.

03 / LIQUIDITY

WHERE THE
LP TOKENS WENT.

1,613.195586306

LP TOKENS IN VAULT

On 18 September 2026, the Doobie LP wallet funded a new lock. Its transaction created a lock account that records the unlock time and moved LP tokens into that account's vault. The three addresses below have different jobs; together they show the path of this position. The vault balance was checked at 20:23 UTC that day.

WHY A TIME LOCK? The LP tokens in this vault sit behind a public unlock schedule, while a decision about their use remains possible after the term ends. This lock covers the cited position; it does not set a token price or control every pool. A previous lock was [unlocked in October 2025 ↗](#).

04 / TODAY & NEXT

WHERE WE ARE. WHERE WE COULD GO.

There is already a place to meet the Doctor, look up \$DOOBIE, explore charts, open a Jupiter swap, and inspect the current LP lock. The next chapter should grow from the people who show up for the character and the culture around it.

PUBLICLY AVAILABLE

LIVE NOW

- The Doctor Doobie world and token profile.
- Charts for \$DOOBIE and selected markets.
- Links to Jupiter trading, including an optional embedded swap.
- The current LP lock record, with addresses and transaction links.

IDEAS / NO COMMITTED DATE

NEXT CHAPTER

- More Doctor Doobie stories, art, and short-form content.
- Community conversations that shape what comes next.
- Creative collaborations that fit the Doctor's world.
- Regular source-linked updates as token and LP facts change.

The ideas on the right are directions for discussion. They become roadmap commitments when the team confirms the work and dates.

05 / RISKS & SOURCES

BE CURIOUS. CHECK THE CHAIN.

\$DOOBIE is a meme token with a cannabis-inspired identity. This paper describes no ownership, payout, or cannabis product redemption rights. Prices, liquidity, and the tools used to view them can change quickly.

MARKETS MOVE

Price and liquidity can change sharply. Trading may become difficult or costly.

WHAT IS LOCKED

The schedule covers this LP position. It is not a blanket lock on every pool.

TOOLS HAVE LIMITS

Charts, explorers, and swaps are third-party services and may show delayed data.

RECORDS CHANGE

Supply, metadata, vault balances, and plans can change after this snapshot.
